Curley Young
Jr. Range Technician
Fort Rucker Aerial Gunnery Range Complex

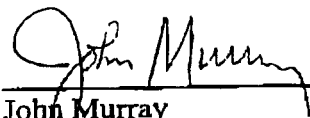

Letter of Appreciation

On behalf of Honeywell Technology Solutions Inc. we would like to extend our sincerest thanks for your superior efforts during the last fiscal year quarter ending September 30, 2003. On October 9, 2003, our customer delivered their latest award fee evaluation containing an overall score of 94 points. This evaluation, which equates to 93% of the award fee pool, represents the highest fee earned on the contract in over five years. Your constant drive to increasing customer satisfaction and continual process improvement has been recognized by our customer.

The Fort Rucker Aerial Gunnery Range Complex (AGRC) availability is at all-time highs because of your relentless pursuit of excellence. These world-class availability metrics provide the war fighter with key advantages in training. What makes this evaluation even more satisfying is knowing that it was accomplished during an exceptionally challenging time. Two high profile special projects were completed. The Multi-Purpose Machine Gun (MPMG) and Hand Grenade (HG) ranges were built in record times at the highest quality levels.

You should take time and reflect on your accomplishments and know that an exacting customer, with high standards of operational excellence, has recognized your performance as superior. You met the challenges up front and delivered. Remain focused and continue your drive for success. Thank you for a job well done!

With gratitude and appreciation,
